

Blame

Verse: 1

Get it line! Soldier time. The all is in position, you are on a mission to
Yeah, destroy girls and boys. Power trip, they're in your grip, all in submission to you
And they can't run, and they can't hide, and all they can do is scream oh...

Chorus:

Don't blame this on me now
Don't wanna say, I told you so
We'll make it through somehow. Trust me...

Verse: 2

You've got shields, clubs you wield. ELF array, provocateurs, they make your day
Get it on! Have some fun! But beware if they should dare to take a stand against you
And you can't run, and you can't hide, and all you can do is scream oh...

Chorus:

Don't blame this on me now
Don't wanna say, I told you so
We'll make it through somehow.

Bridge:

Can we not find a way to make all of this loneliness subside?
We've got to try today to find the truth so long buried inside?

Chorus:

Don't blame this on me now
Don't wanna say, I told you so
I'll pray make it through somehow.
